## My Design:

## UX Explanation:

*The logo and app title are placed at the top-center to establish brand identity immediately, giving the user confidence they are in the right app before entering credentials.*

*The password field includes a show/hide toggle (eye icon) to reduce errors during entry, improving usability especially on small mobile screens.*

*The Login button spans the full width and is visually dominant, creating a clear visual hierarchy that guides the user's eye and reduces decision fatigue.*

*Forgot Password and Sign Up are placed below the primary action in a secondary style, keeping them accessible without competing with the main login flow.*
